### *Diversity in Tech*

What are potential biased/problematic outcomes which might occur if the teams which build the following products are not diverse? As a reminder, diversity can include a variety of different things.

**Automated personal assistants (e.g. Siri, Google Assistant, Cortana)**

**Machine translation systems (e.g. Google Translate)**

**Fitness tracking watch (e.g. Fitbit, Apple watch)**

**Cell phone tower networks**

**Self-driving cars**

**Ride sharing apps**

**Facial recognition systems**

**UMass admission decision predictors**

**"Smart" home security systems**

**Write down three of your own examples**

- 1.
- 2.
- 3.
